DuraPlus 2100°F Chimney System - The innovative triple-wall chimney system from Simpson Dura-Vent, offering superior performance and ease of installation. DuraPlus is the leader in triple-wall chimney for wood, oil, gas and coal-fired appliances. DuraPlus Chimney features a patented firesafe design and:

- Chimney components for every conceivable installation requirement
- Twist-lock pipe and fittings for ease of installation
- Lightweight for easy handling
- .016" 430 stainless steel inner liner
- Galvanized steel outer wall (or optional stainless steel)
- U.L. listed to 103 HT Standard
- 25-year warranty

The DuraPlus 2100° F Chimney System, offered in 6", 7"* and 8" sizes, is designed for use with gravity appliances that have been tested and listed for use with a 2100° HT chimney system, including wood stoves, fireplaces, oil, gas and coal fired appliances. Allow a minimum of 2" airspace clearance to combustibles.

A DuraPlus chimney STAYS COOL ON THE OUTSIDE at all times to protect the building during normal stove operation. It **STAYS HOT ON THE INSIDE** to discourage the deposit of creosote, while providing the correct draft for stove performance. Two layers of insulation (ceramic blanket plus air space) keep the DuraPlus cool outside to protect the building, and hot inside to boost stove efficiency during normal stove operation. If a red hot creosote fire does erupt, the patented DuraPlus **FIRESAFE DESIGN** serves to protect both the chimney and the building.

DuraPlus liner is designed to not warp or buckle. Special end ring suspension at each joint flexes to allow the inner liner to expand lengthwise when hot. In addition, ceramic insulating blanket is flexible and compressible, so the liner can expand outward when hot.

Chimney Lengths - DuraPlus chimney pipe in 6", 9" and 12" lengths have a 1" insulating blanket. The 24" and 36" lengths have a 1/2" blanket. To calculate the installed length of DuraPlus or Dura-Chimney pipe lengths, subtract 1-1/2" from each length of chimney pipe.

Elbows - Use elbows to offset obstructions such as rafters, ridgepoles or joists. 6", 7" and 8" diameters may have two pairs of elbows, if needed. Larger diameters are restricted to one pair of offsets. Offsets greater than 30° are not allowed. Elbows are not adjustable. DuraPlus elbows have a 1" insulating blanket.

Tee with Cap - The tee can be used to start chimneys indoors (inside a chase) or outdoors. The tee clean-out cap is removable for easy chimney cleaning or inspection. Wall straps, a wall thimble and a tee support must be installed with the tee as directed. DuraPlus tees have 1" insulating blanket. Ventilation for chimney must be drawn from outdoors.

Tee Support Bracket - Use to support the tee, the tee bracket is suspended from a wall. Safety shelf protects against creosote leaks. Supports up to 35' of DuraPlus Chimney or 50' of DCR Chimney.

Wall Thimble - The wall thimble adjusts from 4 3/4" to 7 3/4" and fits between standard wall studs. The telescoping pieces can be separated and an extension installed to accommodate thicker walls. The interior trim ring is painted black. The wall thimble must be installed with an appropriate length of chimney pipe through the wall horizontally.

Wood Chimney & Pipe

M & G Dura-Vent

Dura/Plus 2100° F Chimney System

DuraVent
Member of M&G Group

Square Ceiling Support Box and Trim Collar - Square locking ceiling support boxes are painted black. A 1 1/2" wide trim collar is included with all square support boxes. Supports up to 35' of DuraPlus Chimney or 50' of DCR or DC Chimney.

Round Ceiling Support Box - Round locking support boxes are painted black. 1 1/2" trim is included. Supports up to 35' of DuraPlus Chimney or 50' of DCR Chimney.

Flat Ceiling Support Box - Flat ceiling support boxes are not painted. Can be painted with high temperature paint. They are designed for installation in flat ceilings only. One-inch wide trim is attached. Supports up to 35' of DuraPlus Chimney or 50' of DCR or DC Chimney.

Firestop Radiation Shield - Install where a chimney passes through a floor or ceiling without a support box. Centers pipe and provides proper clearance.

Close Clearance Shield - Used when chimney passes through the roof opening with less than the normal 2" minimum clearance to roof trusses or rafters. Pipe must be centered within close clearance shield.

Attic Insulation Shield - Attic insulation shields consist of two parts: collar and base. This universal attic insulation shield must be used in all installations that pass through an attic to prevent insulation and debris from accumulating near the chimney.

Roof Flashings - Select the proper flashing based on the pitch of the roof. Note: a 6/12 pitch has a vertical rise of 6 inches over a horizontal distance of 12 inches. Steep roof flashings are available to accommodate pitches up to 24/12.

Chimney Caps - Chimney caps are made from stainless steel and include spark arrestor screens.

Storm Collars - The storm collar slips around the pipe just above the flashing. Seal the inner edge to the chimney with a non-hardening 500° high temperature sealant.

Extended Roof Bracket - Use to support the chimney when it extends more than 4 feet above the roof. Install with 3/4" thin-wall galvanized electrical conduit. Conduit not included.

Wall Strap - For use in interior or exterior installations to support and stabilize the chimney while assuring a 2" clearance. Wall straps are required every four feet on exterior of building only.

Snap-Lock Adapter - Snaps into the ceiling support box and extends down to fit inside most stovepipe for a drip-free connection to a DuraPlus Chimney system. Painted black. Not a U.L. listed product.

Elbow Strap - Elbow straps are required between two elbows to support the weight of the chimney.

Base Plate - Zero-clearance fireplace adapter. The base plate is to be used on a zero-clearance fireplace when using DuraPlus directly off the unit.

Masonry Anchor Plate - Provides a base for beginning the installation on the top of a masonry fireplace. Factory built chimney's low weight reduces footing requirements and ensures fastest installation time.

Transition Anchor Plate - Provides easy installation of Duraliner and DuraPlus combinations, as well as DuraPlus installation on masonry fireplaces and chimneys.

M & G Dura-Vent

DVL Close Clearance Connector

DVL double-wall stovepipe is engineered for enhanced safety and superior stove performance. The DVL double-wall air insulated design is made to reduce clearance to combustibles. DVL improves stove performance by maintaining high flue gas temperatures for a strong, steady draft.

- Available in sizes 6", 7"* and 8" diameters
- Durable .012" type 430 stainless steel inner liner
- Drip-free design, no cutting or crimping
- 6" clearance to walls, 8" clearance to ceilings
- U.L. listed to 2100° F
- 25-year warranty

DVL Close Clearance Connector

Double wall close clearance connector stovepipe is available in 6", 7"* and 8" diameters for installation with minimum clearance to combustibles (6" to walls, 8" to ceilings). DVL is constructed with a stainless steel inner wall for long lasting performance and safety. For mobile home installations, follow the appliance manufacturer's installation instructions.

DVL Adjustable Length

Used whenever fixed lengths of DVL are not appropriate because of interior obstructions. There is approximately 3" of adjustment on the 6" length and 7" of adjustment on the 12" length of pipe. All pieces must have a minimum 1" overlap with all connecting pipe.

DVL Telescoping Length

Allows one piece installation from stove to ceiling support box with close clearance connector. Available in 29"-48" and 40"-68" extensions. Easy to install; no cutting required.

DVL Close Clearance Adapter

This stainless steel close clearance adapter is the only part that will allow for a connection from double wall DVL to DuraPlus for a through-the-wall or ceiling support installation. Pipe cannot attach properly without this part.

DVL Oval to Round Adapter

Used on appliances with oval flue collars and allows adaption to round pipe.

DVL Increaser

To increase from a smaller appliance flue outlet to larger diameter chimney . Must be used with a close clearance adapter when connecting to the support box.

DVL Adapter Section

Connects DVL pipe to the appliance flue outlet. The damper is optional. To be used as a stove adapter.

DVL Elbows

Offsets obstructions as needed and angles DVL pipe towards the chimney's thimble or the appliance flue outlet. Elbows are not adjustable. 90° elbow not recommended for rear exit appliances.

DVL Tee

Tee comes with convenient clean-out cap. For use with rear exit appliances.

Wood Chimney & Pipe

M & G Dura-Vent

Dura-Black Single Wall Black Pipe

Dura-Black single-wall, 24-gauge drip free black stovepipe features die-formed end fittings and adjustable lengths that eliminate cutting and crimping. 18" clearance to combustibles required for single wall stovepipe. Warranted for a period of five years from installation.

Single Wall Length

To calculate the installed length, subtract 1-1/4" from the "B" measurement (reference the Simpson Dura-Vent brochure at the end of the section). "B" length is overall height of the pipe length.

Slip Connector

Connects Dura-Black pipe to ceiling support box or wall thimble. Allows 10 inches of adjustment for an easy, drip-free installation without cutting the pipe. Required for proper connection of pipe.

Elbows

For offsetting Dura-Black stovepipe. Elbows are not adjustable.

Tee

Use the Dura-Black tee for a drip-free 90° turn with rear exit appliances. Includes clean-out cap.

Stovetop Adapter

Suitable for appliance flue outlets from the size specified to 1/8" smaller inside diameter.

Double Skirted Stovetop Adapter

Adapts appliance flue outlets from the size specified to 3/8" smaller inside diameter.

Increaser

To increase from smaller appliance flue outlet to a larger diameter chimney.

Trim Collar

Use to trim pipe at ceiling support box or wall thimble.

Oval to Round Adapter

The bottom end ovals easily to connect to the oval flue outlet of the appliance.

Damper Section

A short pipe section with the damper conveniently pre-installed.

6"-8" Slip Increaser

Adapts from 6" Dura-Black to 8" Dura/Plus neatly at the ceiling support box or wall thimble. No slip connector needed.

M & G Dura-Vent

DuraChimney II Double Wall Chimney

DuraVent
Member of M&G Group

DuraChimney II is a double-wall, air-cooled chimney system for use with masonry fireplaces which burn wood, oil, coal or gas. DuraChimney II is designed to stay cool on the outside, to provide a hot draft on the inside and to provide a fire-safe design that protects both the chimney and the building. The double-wall, air-cooled design allows the chimney to expand both radially and lengthwise under high temperatures.

- Available in 10", 12", 14" and 16" diameters.
- Durable .016" type 430 stainless steel liner.
- Unitized pipe sections. No field assembly of inners and outers required
- 2" clearance to combustibles.
- Limited lifetime warranty.
- UL Listed to UL 103 and ULC S604 standards.

Single Wall Length - To calculate the installed length, subtract 1-1/2" from the "B" measurement (reference the Simpson Dura-Vent brochure at the end of the section). "B" length is overall height of the pipe length.

Elbows - For offsetting DuraChimney II stovepipe. Offsets greater than 30° are not allowed. Elbows are not adjustable.

Supplementary Support - Use to help support weight of DuraChimney II. Supports a maximum of 25' of chimney. Use additional Supplementary Supports as needed.

Stabilizer - Use to hold DuraChimney II in place. Use inside chase enclosures to stabilize chimney installation. Refer to fireplace manufacturer for additional requirements on use of Stabilizer.

Anchor Plate - Use as a starter section for DuraChimney II. Bolts directly to fireplace outlet.

Anchor Plate with Damper - Use as a starter section for DuraChimney II. Bolts directly to fireplace outlet. Damper section allows chimney to be closed when fireplace is not in use. Includes chain and lintel hook.

Firestop - Use in ceiling/floor penetrations above fireplace. Firestop is not required when passing through the roof. Fits on underside of ceiling.

Attic Insulation Shield - Use in all installations that pass through an attic to prevent insulation and debris from accumulating near the chimney, unless chimney is enclosed through attic. Consists of two parts - collar and base.

Roof Radiation Shield - Required at top of chase enclosure or where chimney passes through the roof. Roof Radiation Shield is not required if chimney is unenclosed in the attic. Four plates (included) make up on shield.

Chase Top Flashing - Encloses the top of a chase while providing a ventilation air passage to the chase. Includes spacer clips.

Chimney Cap - Used to terminate chimney system. Required on all installations. Slides over previous section of DuraChimney II pipe to allow for chimney height adjustment. Include spark arrestor.

Storm Collar - Use to help prevent rain from entering chase. Use with a flashing and chimney cap.

Wall Strap - Use to support and to stabilize the chimney in interior or exterior installations to ensure a 2" clearance. Wall Straps are required every 8' on exterior of building only.

For same day shipping, place order by: 1pm (CO), 2pm (CA, WA) and 11am (MN, TX). Give us a call at 1-800-682-9722

Single Wall Pipe Baffles

Single Wall Pipe Baffles

A 24-gauge, matte black baffle covering half the circumference of a single wall flue. Screw-mounted to the flue with welded brackets which maintain 1" air space between the flue and the baffle. Other lengths, multiple and single wall baffles available by special order; contact AES Inside Sales for pricing. To determine the reduced clearance with the pipe baffle, please consult the appliance manufacturer.

"Reliance Liner" by American Hearth Stainless Steel Chimney Caps

Stainless Steel chimney caps by Reliance Liner are stackable, taking up less stock space. A removable top allows convenient access for cleaning and installation. Made from both 22 and 24-gauge, 304 stainless steel. Featuring 4 stainless steel bolts for a secure attachment and a 3/4" x 3/4" stainless steel expanded metal screen. Custom sizes are available by special order; please call AES Inside Sales for pricing assistance. Lifetime warranty. California mesh is also available by adding "CA" after the item number, and CA caps are stocked at the West Sacramento, CA warehouse only.

HY-C Chimney Caps Big Top Multi-Flue

100% 304-stainless steel welded construction chimney cap with 24-gauge removable hood for easy cleaning and scalloped corners and rolled edges that add style and safety. 18-gauge, 3/4" expanded metal mesh, keeps out rain, birds, animals and debris. Standard mesh height is 8". Also features 24-gauge 304 stainless steel base flanges for extra strength in mounting. Tapmark masonry screw anchor attaches to chimney crown. Screws and adhesive are included. Models come fully assembled unless noted "KD", indicating Knocked Down. Lifetime warranty.

Big Top Multi-Flue

Mesh meeting California regulations (18-gauge, 5/8" 100% 304 expanded stainless steel) is available by special order only, please call AES Inside Sales for more information.

4

An 8" high chimney cap, designed for outside mounting to provide 95% free air space. The free air space creates better draft and the durable construction provides strength to resist the elements. 18-gauge 3/4" expanded mesh is turned inward at the base to allow cover to rest firmly on the tile which closes any opening around the tile. Mesh meeting California regulations (18-gauge, 5/8" 100% 304 expanded stainless steel) is available by special order only, please call AES Inside Sales for more information. Available in all stainless steel or black painted galvanized steel.

Stainless Steel

Constructed of 304 stainless steel, a 24-gauge single piece stainless hood with roll formed edges and 16-gauge base for extra strength. Stainless steel slotted hex-head bolts. Lifetime warranty.

Craftsmanship.

Chimney Pots can also be used to cover an unsightly metal fireplace termination or used in lieu of a factory rain cap or spark arrestor (*check with your local ordinance for proper application with pre-fabricated fireplace systems*). Chimney pots are a popular selection for rain caps and spark arrestors for masonry chimneys as well.
